# **Object Template**

### **Q** Overview Page

• Label: [Object Label]

• Plural Label: [Plural Label]

• API Name: [API Name]

• **Description**: [If available from metadata]

• Record Type Count: [#]

• Field Count: [#]

• Validation Rule Count: [#]

• Created By / Modified By: [If metadata contains audit fields]

### 🍣 Fields Database

Label	API Name	Туре	Required	Default Value	Picklist Values	Formula	Help Text

Summarize special logic in formulas or lookup filters as inline collapsible toggles.

## Record Types Database

Title	Column 1	Column 2	Column 3	Column 4	Column 5
Record Type Label	API Name	Description	Default?	Active	Profiles Visible
<u>Untitled</u>					

Include business logic if record type drives layouts, processes, or flows.

### Compact Layouts

Highlight which layouts are used in Mobile vs Desktop.

### Validation Rules Database (1)

Name	Formula	Description	Validation Status
Untitled			

Object Template

For each validation rule, use this format:

[Rule API Name]

**Purpose**: [Auto-detect based on formula logic — e.g., "Ensures Email is present when Lead Source = Web"]**Error Message**: "..."**Error Location**: Field: .... / Top of Page

▼ See Logic Breakdown

[Validation Rule Formula Here]

### Process Automation

### Workflows

Title	Column 1	Column 2	Column 3
Workflow Name	Trigger	Actions	Active
<u>Untitled</u>			

### **Approval Processes**

Title	Column 1	Column 2	Column 3	Column 4
Process Name	Entry Criteria	Approval Steps	Rejection Actions	Final Approval Actions
<u>Untitled</u>				

### Flow References

### Integrations

- ▼ Document any integration touchpoints related to this object
  - External Systems: [List any external systems that interact with this object]
  - API Usage: [Note if this object is heavily used in API integrations]
  - Custom Web Services: [Document any custom web services that utilize this object]

## Page Layouts

Object Template 2

### ▼ Page Layout Structure

```
graph TD; A["[Layout Name]"] \rightarrow B["Section 1"]; A \rightarrow C["Section 2"]; B \rightarrow D["Field Group 1"]; B \rightarrow E["Field Group 2"]; C \rightarrow F["Related Lists"];
```
